Patrocini richiesti

Società Italiana di Chirurgia della Mano

Dear Friends,
We are so glad and honored to invite you to the “20th Giornata Milanese di Chirurgia della Mano”.
Our 2023 meeting is focused on upper limb trauma: from the Emergency Room to the Operating Room.
This topic involves several different professional figures, called to a complex synergic effort and to face peculiar challenges. Even more important, this type of clinical event entrusts to our care an acute patient, often confused and worried, needing our prompt and empathic reaction, driven by clinical experience, scientific evidence and by the attention to the patient’s quality of life.
We hope that this rich programme, including several opinion leaders in the field, featured by great interactivity among the speakers and with the audience, will give us all a small but significant help to best tackle this challenge.
Our effort will be aimed at providing preferred practice patterns not only to the hand surgeons but also to the ER doctors, supporting them in properly handling patients’ referral (who, when, why, to whom).
The synergistic work of all the professionals allows us to give the patient the best possible treatment.

Prof Giorgio Pajardi
Dr Elisa Rosanda
